

Demonstration of Proposed Features

Date	05 July 2026
Team ID	SWTID-2026-4324
Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User Input Form	Allows users to enter Nitrogen, Phosphorus, Potassium, Temperature, Humidity, pH, and Rainfall values.	Implemented	Yes	Working successfully
2	Crop Prediction	Predicts the most suitable crop using a trained Machine Learning model.	Implemented	Yes	Accurate prediction
3	Flask web interface	User-friendly web application developed using Flask.	Implemented	Yes	Responsive interface
4	Model integration	Integrated the trained .pkl model with the Flask backend.	Implemented	Yes	Successfully deployed
5	Result Display	Displays the recommended crop after prediction.	Implemented	Yes	Output shown Correctly
6	Online Deployment	Deployed the application on PythonAnywhere for online access.	Implemented	Yes	Live demo available

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
